Dariel Jesús Álvarez González

Computer Science Student
darialvjs@gmail.com | San José, Costa Rica | github.com/DariALV | Portfolio: DariALV.github.io

PROFILE

I'm a final-year CS student at UCR who loves getting hooked on new problems and sticks with them until they're solved. I'm language-agnostic, I learn fast and I like understanding how and why things work, not just that they do.

EXPERIENCE

Order Processing Coordinator (Part-time) – Elixir CR — January 2026 - Present

- Process 20-60 daily orders from sales: normalize unstructured messages and prepare routes for couriers using Google Sheets.
- Built internal tools on my own initiative: Apps Script automation for sheet formatting and a Flutter + Firebase app to handle inventory management.

PROJECTS

4-core RISC-V Processor – Computer Architecture (CI-0120), UCR — November 2025
Logisim Evolution, Python

- Built a 4-core CPU, each core with a 5-stage RISC-V pipeline (team project).
- Wrote a compiler in Python that takes a small expression language and outputs RISC-V assembly code.
- Wrote an assembler in Python that takes RISC-V assembly code and outputs machine code.

Costa Rica Legislative Coverage – Computing and Society (CI-0133), UCR — September 2026 - Present
Python
Open corpus linking Costa Rican news articles to the bills they cover from the Legislative Assembly.

- Built web scrapers for CRHoy.com and Delfino.cr.
- Building the article-bill links using vector embeddings.

Overthrown – Research in Computer Science (CI-0134), UCR — May 2026 - June 2026
Godot 4, Supabase
A Vampire Survivors-style game built as a research artifact for a study on camera feedback in video games.

- Implemented a spatial hash grid that speeds up neighbor queries within a radius for all entities.
- Built a player telemetry logging system for position, health and other variables every 100ms.

EDUCATION

University of Costa Rica – Bachelor's Degree in Computing (Computer Science) — 2022 - December 2026 (expected)
San José, Costa Rica

SKILLS

Proficient	Python, C++, Godot 4 / GDScript
Familiar	Lua, SQL, R, JavaScript, HTML, CSS, Dart, RISC-V assembly
Tools	Git, React, Google Apps Script, Flutter, Firebase, Logisim Evolution

LANGUAGES

Spanish — Native

English — C2 - EF SET certificate (73/100)

VOLUNTEERING

Math Contributor – Brainly (online Q&A learning platform) — 2021 - 2024
Answered 287 math questions from students. 53 answers were chosen as the best answer.
